## **What size rod do I need?**

Choose a rod that will accommodate the width of your window. If your window measures between 66" and 84" wide, you have two size options: 48"-84" or 66"-120". Using the larger rod will offer more support and stability for heavier weight draperies or if your drapery is lined. We recommend the 48"-84" rod if the drapery is made from a sheer fabric or if the drapery is unlined.
