

MEASURING FOR FURNITURE

IS IT THE RIGHT SCALE FOR THE ROOM?

Tape together sheets of newspaper to match the Width X Depth of the pieces you're considering. Place the newsprint pieces on the floor — and walk around them. Put dining chairs on the newsprint to help visualize the mass and 30" height. Is there enough clearance to walk by? Is it too large for the space or too small in scale? Perhaps a different floor arrangement works better. Its easy to move newsprint until your satisfied with the results.

WILL IT FIT THROUGH THE DOOR? OR UP THE STAIRS?

Measure all doorways, exterior and interior, that the new furniture needs to clear. Hallways or stairways may also be transit points — measure there too.

ENTRYWAYS, HALLWAYS & STAIRWAYS:

WIDTH _____ HEIGHT _____
 WIDTH _____ HEIGHT _____
 WIDTH _____ HEIGHT _____
 WIDTH _____ HEIGHT _____
 WIDTH _____ HEIGHT _____

NOTE THE MEASUREMENTS OF THE FURNITURE YOU'RE PLANNING TO ORDER:

If the width or depth is larger than the entryway or hallway dimensions, consult your Calico sales associate to determine if the piece can be angled to fit.
